VFS Vertical Drop Packer

The Rovema Vertical Drop Packer VFS is the ideal machine for packaging pillow style bags laying flat into cases or trays.

Features and Benefits

■ High Flexibility and Accuracy

Many different collations are possible with the VFS - broad or small side leading, single or multi layer, shingled or side by side. The exact positioning of the bags is ensured via special bag handling modules.

■ Simple Operation

The VFS is an operator friendly and simple to use drop packer. It is accesible from all sides, is easy to maintain and can be quicly changed to run different configurations. The standard Allen Bradley ControlLogix platform ensures a simple operation and an exact repeatability of all movements.

■ Ultimate Layout Flexibility

The compact, flexible and ergonomic design ensures ease of operation and ultimate layout flexibility. The infeed and discharge directions can be chosen to fit specific requirements and create an ideal layout.

Gentle Product Handling

■ The possibility for manual or automatic drop distance adjustments ensures a gentle loading of fragile products.

■ High Efficiency

The VFS is capable of handling case sizes of up to 23 10/19" x 23 10/19" x 15 3/4" (600 mm x 600 mm x 400 mm) with infeed speeds of up to 120 bags per minute and an output of up to 25 cases per minute. Also, quick and simple change-over procedures gives high flexibility and efficiency

■ Integrated Systems

The vertical drop packer VFS can operate as a stand alone unit or be integrated with other Rovema machines into a complete line.
