

# VPL-400

The New Award Winning  
Continuous Motion  
Machine

## The VPL-400 Features:

- Modern linear servo drive technology for highest output and flexibility
- Speeds up to 150 bags per minute
- Highest seal quality
- Quick and easy changeovers
- Stainless Steel Construction

- Filling
- **Bagging**
- Cartoning
- Case Packing

## High Speed Packaging for Frozen Food

many more  
products can be  
packaged with the  
VPL-400.

# High speed packaging for frozen food

## VPL 400

Award Winning Continuous Motion Machine

**T**he award winning continuous motion bagger model VPL-400 marks a new era for vertical form, fill and seal machines.

Equipped with a two-axis linear servo drive and fully programmable sealing functions, the new VPL-400 offers many advantages during the packaging process. The vertical and horizontal jaw movement, speed, sealing and cooling times, and sealing pressure are all freely programmable through the operator's interface for greatest flexibility and highest productivity.

### VPL-400 Cross Sealing Station with Linear Servo Drive Technology for Highest Performance

- Linear servo drive for vertical movement
- Linear servo drive for horizontal movement
- Programmable stroke, speed profiles, sealing pressure for complete flexibility
- Cross sealing jaws can be executed for heat sealable as well as LDPE materials

### Features and benefits of the VPL-400

- Bag widths from 3 1/7" to 15 3/4" (80 mm to 400 mm)
- Fully programmable vertical and horizontal jaw movement
- Stainless steel construction is standard
- Individual settings for sealing time and sealing pressure
- Allen Bradley controls or P@CK controls
- Vacuum assist film feed belts
- Speeds up to 150 cycles/minute
- Large size range for different applications
- Capable of handling both heat-sealable and LDPE film structures with proper tooling
- Compact Design
- Quick size changeover without tools
- Low maintenance requirements and high reliability
