

BVC 260/400 FLEXIBLE – FORM FILL AND SEAL MACHINE

*Winner of
the Hershey
Supplier
Excellence
Award 2019.*

Up to 105 attractive Stand-up pouches with Zip per minute!

FOR HIGHEST FLEXIBILITY IN BAG SHAPE DESIGN

The highlights.

- Pillow bags, Stabilo Seal and Doypack-like Stand-up pouches with Zip (RoPack) on one machine
- Up to 105 attractive Stand-up pouches with Zip per minute
- Quick format change between different bag shapes
- Easy and efficient gassing is possible to extend the shelf life
- High efficiency and faster cleaning at the closing devices due to Sense & Seal product detection
- “Stripping” function for an improved filling volume
- Particularly suitable for sweets with “double twist”

ROVEMA

Passion for packaging

BVC 260/400 FLEXIBLE – FORM FILL AND SEAL MACHINE

Use the benefits of vertical packaging with the ROVEMA BVC Flexible machine series.

Doypack-like RoPack bags, as visually appealing as horizontally manufactured bags, but with all benefits of vertical packaging: e.g. lower operating costs, higher flexibility and a small footprint.

Various bag applications possible:

e.g. Zip, adhesive tape for reclosing or opening features with laser perforation.

“Stripping” function for an enhanced filling ratio:

The sealing jaws gently guide the product into the bag; at the same time, the sealing area remains clean and free of product – especially important for products with double twist.

Sense & Seal product detection protects the sealing tools from dirt and damage – even in case of product within the sealing area. Sense & Seal ensures a high machine availability and consistent seam quality.

No offset in the top seam through automatic edge control with ultrasonic detection and servo motoric adjustment.

Resource-saving packaging process due to the vertical continuous process – nearly all compound packaging materials, even in thin packaging qualities, can be processed.

Hygienic and quick cleaning through product area being separated from drive area. Space saving integration of additional parts or accessories (e.g. printer, labeler, applicators for reclosures or Zip-bags) possible.

Technical Data.

	BVC 260 Flexible RoPack with Zip*	BVC 400 Flexible RoPack with Zip*
Nominal output (B/min.)	Up to 105	Up to 80
Sealing force (N)	6000	8000
Format area (mm)	Stand height up to 260	Stand height up to 400

*For other bag shapes, technical data of standard BVC applies.
Subject to technical changes. Performance data in dependence of product and packaging material.

Also available in stainless steel.
