

BVK 260 – CONTINUOUS MOTION FORM FILL AND SEAL MACHINE

*With an output
rate of up
to 120
bags/minute.*

Chunky,
granulated or
powdery – with highest
bag and sealed
seam quality

The illustration can contain accessories
and special fittings which are not included
in the standard scope of delivery.

PROVEN AND RELIABLE

With a convincing price/performance ratio.

- Highest product safety using proven and reliable machine technology
- Processing of various mono films and laminated films using vacuum assisted film feed belts
- High bag quality using a patented process for continuous bag manufacturing
- Small footprint through compact design
- Intuitive, easy to understand operation, user guidance with graphical support in national language

ROVEMA

Passion for packaging

BVK 260 – CONTINUOUS MOTION FORM FILL AND SEAL MACHINE

Ideal for standard bag shapes like pillow bags
and block bottom bags.

The **BVK 260** can pack a diverse range of products – lumpy, granular or powdered – using the highest bag and sealed seam quality. Depending on the specific product, the machine will be combined with a volumetric cup filler, auger feeder or a multihead weigher.

With an output performance up to 120 bags/minute and format sizes ranging from 60 mm to 260 mm, the **BVK 260** is the ideal form fill and seal machine for standard bag styles such as pillow bags and block bottom bags.

Optional extensions

- Extension of the film reel carrier, additional film spindle
- Cutting and splicing table
- Add-on module for printers and labelers
- Air conditioning unit for environment temperature > 35 °C
- Electrical synchronization with multihead weighers, volumetric feeders, printers, labelers
